THE SERIES 5000 WINDOW SYSTEM

ENERGY EFFICIENCY | GORGEOUS PRACTICALITY

The Series 5000 projected window is our most affordable thermally broken product. Utilizing a pour and de-bridge thermal break, the 5000 is your most cost-effective way to get a stunning, energy efficient custom window without sacrificing performance or aesthetics. With nail-on, equal leg, comp. channel, and integral recessed panning frame options, this window series makes installation of this product efficient, attractive, and weather-tight.

Our Series 5000 uses extruded, age hardened aluminum that boasts a T-6 rating for strength and durability. This is a window built to last with a wall thickness that meets or exceeds commercial window standards.

Economical, durable and beautiful, the series 5000 finds the sweet spot where functionality meets indulgence. You can just call it: Gorgeous Practicality.
